Life After NEG

Three comprehensive reviews:
Finkel, NEG, ACCC

Greatest public policy failing in decades

A framework must be agreed to provide a degree of investment certainty for energy affordability, reliability and sustainability

In the meantime, wholesale market contract prices are increasing again, ideology & politics dominate policy, energy literacy remains a barrier, energy productivity opportunities exist "here and now"

Qld Manufacturing Pilot Project

Trial findings

Trial savings

28%

reduction in energy costs
were identified

Simple payback

4.9 years

average payback to achieve
28% reduction in costs

Sector opportunity

\$335m

annual energy saving
potential for the sector on
electricity alone based on
spend of \$1.2b pa

Payback <3yr

\$119m

annual energy savings
and,
Payback >3yr **\$216m**
annual energy savings

“I’ve been managing this site for 25 years and I thought I knew it inside out. This project has shown me that my knowledge was only skin deep, particularly in relation to energy.” - Operations Manager, JBS Rockhampton
