

## INDUSTRY TOUR: ORORA DANDENONG CANNING FACTORY TOUR - MAY 28

*Bus tour, May 28, 8 person max*

Step inside Orora's advanced beverage can manufacturing hub in Dandenong—a benchmark facility for high-speed, flexible aluminium packaging production in Australia.

Designed to meet evolving demand across beer, soft drink, energy, and RTD segments, the site integrates a multi-size can line with rapid changeover capability and Orora's latest direct-to-can digital printing technology. This enables shorter production runs, faster turnaround, and greater SKU agility—critical for today's fragmented and innovation-driven beverage market.

During the tour, you'll gain insight into:

- High-efficiency can forming and decoration processes at scale
- Integration of digital print for mass customisation and limited releases
- Operational strategies supporting throughput, quality control, and supply chain responsiveness
- How process efficiency, reduced waste, and lightweight aluminium packaging contribute to lower lifecycle emissions

Aligned with Orora's broader decarbonisation pathway, the facility reflects a focus on operational efficiency and material optimisation—supporting reduced energy intensity per unit while enabling more sustainable packaging outcomes across the value chain.

See how Orora is aligning advanced manufacturing with market demand—delivering speed, flexibility, and more sustainable outcomes for modern beverage production.

*Clothing and safety requirements :*

- Steel capped shoes (can be provided if not owned)
- Long pants & long sleeves
- No loose clothing
- Gloves and ear plugs (can be provided if needed)

***Register here. Tour will run May 28, departing by bus at 2pm. Returning approx 5:30pm***

*Note the hosting company retains the right to approve attendee list*
